Crombie, who is normally a sports photographer, sought out creating this image for several months.

The photo was taken with a Canon 1DX Mark III and was one of between 400 and 500 frames he shot that evening. When asked about the time and effort he spent trying to make this happen, Crombie said it was all worth it.

Sony Has Developed a 128MP Global Shutter Medium Format Sensor

MAR 09, 2021 JARON SCHNEIDER

Sony has announced that it is close to releasing the IMX661, a 127.68-megapixel “large format” sensor with a global shutter. While aimed at the industrial market, this sensor can be seen as an indication that Sony is capable of releasing a global shutter sensor for the consumer market.

Nikon NX Studio Review: A Good Start That Will Get Better

Nikon recently announced the launch of its free NX Studio software, which has hopes to be a Lightroom/Capture One Pro alternative for Nikon RAW processing on Windows and Apple computers.

This new application is supposed to view, process, and edit still images and videos from any Nikon digital system (past, present, and future), merging the tools found in ViewNX-I & Capture ND-D applications. The idea was that it would take two applications — one for minor adjustments and one for more comprehensive changes— and consolidate them into a single application while fixing some of the workflow headaches for the Nikon user base. The result would thus give — as Nikon explained to me on a call — “the best raw processing experience for Nikon files instead of what you’ll get from the other apps out there currently.”

Photo CHat

Why we like some photos?

How this works:

- I have the greatest respect for all photographers shown
- If you recognize a photo = say nothing!
- Evaluate your impressions, emotions, technical points...
 - What works
 - What doesn't work
