DJI Updates Mavic 3: It Now Has All Capabilities Promised at Launch

DJI has published a firmware update for the [Mavic 3](#) that fully unlocks all of the drone's capabilities and lets it do everything the company [promised](#) it could when it was launched last year.

Firmware Update v01.00.0500

That update has finally arrived. DJI has issued Aircraft Firmware v01.00.0500 and Remote Controller v04.13.0500 that can be installed through the DJI Fly App on [iOS](#) or [Android](#) (version 1.5.8 on both is required). It adds the last few features that bring the drone up to the full capabilities that were advertised at launch:

- Added QuickShots including Dronie, Rocket, Circle, Helix, Boomerang, and Asteroid.
- Added Panorama mode, capable of capturing in high resolution.
- Added burst shooting.
- Added digital zoom for normal video mode.
- Added Color Display Assist for D-Log.
- Added 4K/60fps and manual EI adjustment for MasterShots.
- Added QuickTransfer.
- Added zoom and D-Log for FocusTrack when recording video.
- Added support to set RTH altitude for Advanced RTH.
- Added USB mode for [Mavic 3 Cine](#) for copying data.
- Optimized accuracy of color correction.
- Increased image sharpness of Tele camera when shooting at high magnification.
- Optimized image area for Timelapse photos.
- Added support to DJI RC Pro to output clean HDMI footage.
- Added support for DJI RC Pro to cache video and download original video to an external SD card.
- Added support to use DJI RC Pro with [DJI Air 2S](#).
- Fixed some minor bugs.

[@ Twitter](#)

Millions of Reasons to Laugh

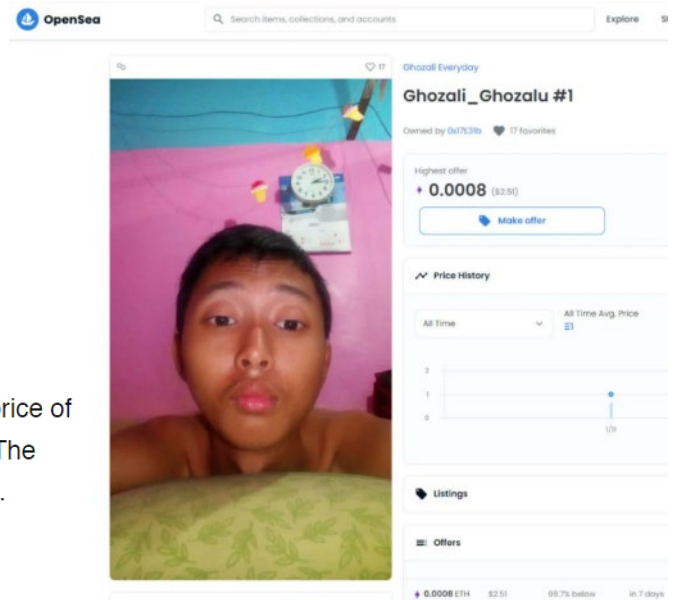

Student Becomes a Millionaire After Turning Selfies Into NFTs as a Joke

“...the collection began going viral online after Indonesian celebrity chef Arnold Poernomo and other prominent NFT collectors stumbled upon Ghozali’s “joke.” ”

Over \$1 Million in Sales

Once the crypto influencers began promoting the collectibles, sales of the 933 exploded. The price of individual Ghozali selfie NFTs spiked at one point to a high of 0.9 ETH each, or about \$3,000. The collection has a total volume traded (at the time of this writing) of 381 ETH, or over \$1.2 million.

[@ Petapixel](#)

Meta Mega NFT

Meta is working on letting users create, sell NFTs on Facebook and Instagram

“According to the [Financial Times](#), Meta, the parent company of Facebook and Instagram, is looking at ways to allow its users to create and sell non-fungible tokens (NFTs) on its platforms. The article also cites that NFTs are currently a \$40 billion market, with no signs of slowing down anytime soon.”

AP NFT

Associated Press to launch NFT photography marketplace on January 31

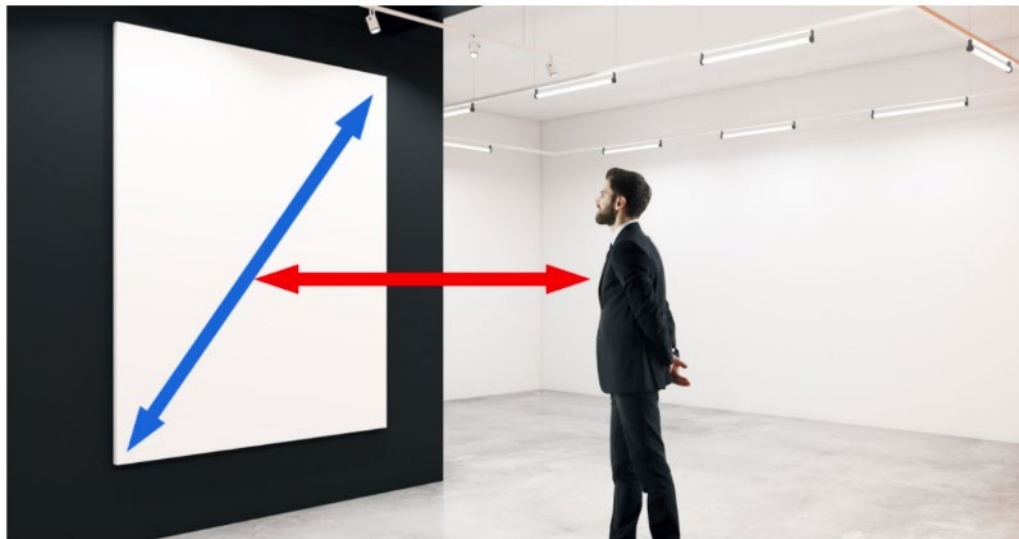

“AP says that collectors 'of all levels' will be able to buy, sell, and trade images in their collections. Metadata for each image containing information about the time, date, location, equipment used and technical settings is included with each NFT.”

More is... needed?

How Many Megapixels Do You Actually Need?

- Zooming capabilities
- Cropping freedom
- Online x Print
- Printing size and viewing distance
- Personal Pleasure 😊

A common rule of thumb is that the image diagonal (blue) should be about half to two-thirds of the viewing distance (red).

6 Important elements in minimalist photography, and why they work

 by Dana Walton | 4 Comments

I love storytelling images filled with emotive details, yet I'm equally fond of images that, with barely anything in the frame at all, make a soul-stinging impact on the viewer. Such is the evocative power of the art of minimalist photography.
